## Product Description

### Natural Cosmetics Raw Materials Acetyl Tetrapeptide-5 () White Powder

Acetyl Tetrapeptide-5 inhibits glycosylation and ACE-1 activity. Acetyl tetrapeptide-5 reduces oedema and relieves vascular pressure by improving the vascular system and strengthening the skin under the eyes. Acetyl tetrapeptide-5 can be used for research into antioxidants, anti-ageing skin care.

Acetyl Tetrapeptide 5 is particularly suitable for use in eye products to eliminate bags and dark circles under the eyes and to improve skin elasticity and smoothness.

As we age, the skin gradually loses its elasticity, muscle function weakens and the skin around the eyes loosens, creating bags under the eyes. Excessive accumulation of water in the eyelids is eyelid oedema. Acetyl Tetrapeptide-5 eliminates oedema and improves skin elasticity and smoothness. Collagen cross-linking is also the cause of under-eye puffiness. Acetyl tetrapeptide-5 inhibits glycation and reduces the effects of puffiness and wrinkles under the eyes.
